Input-layer mechanism vs ticket benefit across 35 datasets (round 10, permutation importance)
tuned (ρ=0.14, p=0.407)
untuned (ρ=0.14, p=0.436)
ticket − random mask (pp)
input-layer weights pruned
tuned (ρ=0.16, p=0.361)
untuned (ρ=0.14, p=0.431)
ticket − random mask (pp)
Spearman(mask, RF importance)
tuned (ρ=0.24, p=0.163)
untuned (ρ=0.27, p=0.125)
ticket − dense (pp)
Spearman(mask, RF importance)
